Oil Container Filling Model DPV915

Bottle and Container Filling: Model Combi-Oil

Hand Operated Screw Cap Closure
(for pre threaded caps)

OIL CONTAINER FILLER

Compressed air operation.
Specially designed to volumetrically fill tins however with optional filling tubes it can also be used to fill bottles. Filling capacity is 200ml - 5000ml. Also available in a twin head version.

BOTTLE AND CONTAINER FILLER

Compressed air operation.
The COMBI system consists of 2 different filling systems. One is for bottles 250ml – 1000ml and the other is for tins or large jars 3000ml – 5000ml. Bottles and tins can filled at the same time.

The bottle filling system is volumetric. The production output is between 400 – 700 l/h

HEAT SHRINKING UNITS

Both are very cost effective systems for applying PVC caps. Hand held unit or for larger runs the bench mounted model.

SECURITY SEAL FOR PRE THREADED CAPS

A hand operated crimper that is used to crimp the pilfer proof seal on pre-threaded caps.
